POP QUIZ! PLAY TO WIN!

Question: According to U.S. Census Bureau data, the average life expectancy for an American at age 65 is an additional [blank] years for a man and [blank] years for a woman. Of course, there's no crystal ball that tells us how long we're going to live, but in budgeting and saving for retirement, it makes sense to plan for at least an average life span, to reduce the risk of outliving your money.

- A. 18.8 years / 21.4 years
- B. 19.3 years / 27.9 years
- C. 22.6 years / 19.7.4 years
- D. 29.7 years / 13.4 years
- E. None of the above

[Click here to submit your answer for a chance to win a \\$20 bonus gift card!](#)

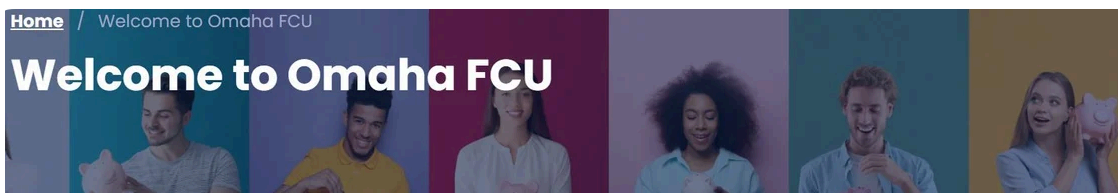

Last Issue's Question: It's never too late to start saving for retirement. You still have time to build your nest egg with compounding interest and investment returns. Starting at age [blank], the IRS allows you to accelerate your savings with

catch-up contributions — higher limits than for younger workers on how much you can put into IRAs or workplace 401(k)s. **Answer: D. 50**
